HINGED KNEE BRACE

SUP1046

HCPCS: L1812

Perfect for daily activities, exercise, and athletics, the Vive Hinged Knee Brace effectively supports the knee joint and surrounding tendons, ligaments, and muscles with moderate compression and removable medial and lateral hinges. The open patella knee brace is designed to reduce strain on the kneecap while relieving pain, swelling, and inflammation due to sprains, strains, arthritis, and injury. Constructed with a breathable neoprene blend, the lightweight, low-profile brace is reversible for use on the left or right knee and easily adjusts with four fastener straps to comfortably fit most adults.

IMPROVED STABILITY AND SUPPORT

Perfect for exercise and daily activities.

FITS MOST MEN AND WOMEN

Adjustable straps provide a customized fit.

OPEN PATELLA DESIGN

Thermal compression and non-slip supportive design assists in injury recovery.

IMPROVED KNEE STABILITY AND SUPPORT

The Vive Hinged Knee Brace provides comfortable support while recovering from injuries or surgeries, and additional stability for weak or arthritic knees. The reversible, nonslip knee brace also provides soothing compression and retains therapeutic heat to reduce swelling and inflammation, relieve knee pain, and promote healing on the left or right knee as needed.

ADJUSTABLE OPEN PATELLA DESIGN

Secured with four strong fastener straps, the Vive hinged knee brace easily adjusts to fit most adults. The open patella design relieves pressure on the knee cap while providing stabilizing support for ACL and MCL injuries, helping relieve strains, and sprains, and for patellar tracking.

REMOVABLE SUPPORT HINGES

Improving medial and lateral stability, the hinged knee brace includes two removable hinges to support the knee ligaments, tendons, and joints. Made with tempered aluminum, the hinges are easily removed from the integrated sleeves when less support is needed.

BREATHABLE AND LIGHTWEIGHT

Naturally moisture-wicking, the hinged compression knee brace is made with a latex-free, neoprene blend that stays cool and dry all day. The breathable brace is lightweight and features a slim profile that can easily be worn under loose-fit clothing. Perfect for exercise and daily activities, the non-slip material will not bunch, pinch or irritate the skin for maximum comfort.
